

Equivalent Fractions

Pre-Check: show what you know.

Score _____ / 6

1. Write the fraction that is shaded.

2. Write the fraction for the dot.

3. The denominators are the same.
Write > or <.

$$\frac{5}{6} \bigcirc \frac{2}{6} \quad \frac{3}{10} \bigcirc \frac{7}{10}$$

$$\frac{2}{4} \bigcirc \frac{3}{4}$$

4. The numerators are the same.
Write > or <.

$$\frac{3}{4} \bigcirc \frac{3}{6} \quad \frac{2}{8} \bigcirc \frac{2}{3}$$

$$\frac{1}{2} \bigcirc \frac{1}{4}$$

5. Write the missing factor.

$$4 \times \square = 12 \quad 5 \times \square = 10$$

$$3 \times \square = 12 \quad 2 \times \square = 8$$

6. Write the next two multiples in each row. Then write the number that is in both rows.

4	8		
6	12		

In both rows:

Equivalent Fractions

Pre-Check: show what you know.

Score _____ / 6

1. Write the fraction that is shaded.

Lesson 7.1 · Equivalent fractions with models

2. Write the fraction for the dot.

Lesson 7.3 · Number lines and dividing

3. The denominators are the same.
Write > or <.

$$\frac{5}{6} > \frac{2}{6} \quad \frac{3}{10} < \frac{7}{10}$$

$$\frac{2}{4} < \frac{3}{4}$$

Lesson 7.4 · Compare with a common denominator

4. The numerators are the same.
Write > or <.

$$\frac{3}{4} > \frac{3}{6} \quad \frac{2}{8} < \frac{2}{3}$$

$$\frac{1}{2} > \frac{1}{4}$$

Lesson 7.5 · Compare with a common numerator

5. Write the missing factor.

$$4 \times 3 = 12 \quad 5 \times 2 = 10$$

$$3 \times 4 = 12 \quad 2 \times 4 = 8$$

Lesson 7.2 · Multiply to find equal fractions

6. Write the next two multiples in each row. Then write the number that is in both rows.

4	8	12	16
6	12	18	24
In both rows: 12			

Lesson 7.4 · Compare with a common denominator
