

Add To and Take From

Read each problem. Add to solve.

Example

Mia has 8 star stickers. Her friend gives her 5 more. How many star stickers does Mia have now?

$$\underline{8} + \underline{5} = \underline{13} \quad \underline{13} \text{ star stickers}$$

1. 9 frogs sit by the pond. 6 more frogs hop over. How many frogs are by the pond now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ frogs}$$

2. Leo has 7 toy cars. He gets 4 more for his birthday. How many toy cars does Leo have now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ toy cars}$$

3. Grandpa picks 12 apples. Then he picks 6 more. How many apples does he have now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ apples}$$

4. There are 8 penguins on the ice. 8 more penguins slide over. How many penguins are on the ice now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ penguins}$$

Add To and Take From

Read each problem. Subtract to solve.

Example

Ava has **14** balloons. **5** balloons float away. How many balloons does Ava have now?

$$\underline{14} - \underline{5} = \underline{9} \quad \underline{9} \text{ balloons}$$

1. There are **17** cupcakes on a plate. The class eats **9** of them. How many cupcakes are left?

$$\underline{\quad} - \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ cupcakes}$$

2. **13** butterflies are in the garden. **6** fly away. How many butterflies are still in the garden?

$$\underline{\quad} - \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ butterflies}$$

3. Omar has **16** acorns. He drops **7** of them. How many acorns does Omar have now?

$$\underline{\quad} - \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ acorns}$$

4. There are **20** fish in a tank. **10** fish go to a new tank. How many fish are left in the first tank?

$$\underline{\quad} - \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ fish}$$

Add To and Take From

Add or subtract? Write + or – in the circle. Then solve.

1. Rosa has **11** strawberries. She picks **7** more. How many strawberries does she have now?

____ ○ ____ = ____ strawberries

2. There are **15** leaves on a branch. The wind blows **8** away. How many leaves are on the branch now?

____ ○ ____ = ____ leaves

3. The team has **6** soccer balls. The coach brings **9** more. How many soccer balls does the team have now?

____ ○ ____ = ____ soccer balls

4. Nia has **18** cookies. She shares **9** with her class. How many cookies does Nia have left?

____ ○ ____ = ____ cookies

5. **12** turtles sit on a rock. **4** turtles swim away. How many turtles are on the rock now?

____ ○ ____ = ____ turtles

Add To and Take From

Draw dots in the ten frames to solve.

Example

Sam has 7 toy rockets. He gets 6 more. How many toy rockets does Sam have now?

$$\underline{7} + \underline{6} = \underline{13}$$

13 toy rockets

1.

8 owls sit in a tree. 7 more owls fly in. How many owls are in the tree now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

 owls

2.

There are 15 pumpkins at the farm stand. People buy 6 of them. How many pumpkins are left?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

 pumpkins

3.

Dad has 14 carrots. He uses 8 in the soup. How many carrots are left?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

 carrots

Add To and Take From

Circle the number sentence that matches. Then solve.

Example

Theo has **9** teddy bears. He gets **3** more. How many teddy bears does Theo have now?

$9 + 3 = \square$

$9 - 3 = \square$

$12 - 9 = \square$

12 teddy bears

1.

There are **16** doughnuts in a box. The family eats **7**. How many doughnuts are left?

$16 + 7 = \square$

$16 - 7 = \square$

$7 + 9 = \square$

_____ doughnuts

2.

Ivy picks **10** pears. Then she picks **5** more. How many pears does Ivy have now?

$10 - 5 = \square$

$5 + 5 = \square$

$10 + 5 = \square$

_____ pears

3.

There are **11** beach balls by the pool. **4** roll into the water. How many beach balls are still by the pool?

$11 - 4 = \square$

$11 + 4 = \square$

$4 + 4 = \square$

_____ beach balls

4.

Eli has **8** pinecones. He finds **9** more. How many pinecones does Eli have now?

$9 - 8 = \square$

$8 + 9 = \square$

$8 + 8 = \square$

_____ pinecones

Add To and Take From

Read each problem. Add to solve.

Example

Mia has 8 star stickers. Her friend gives her 5 more. How many star stickers does Mia have now?

$$\underline{8} + \underline{5} = \underline{13} \quad \underline{13} \text{ star stickers}$$

1. 9 frogs sit by the pond. 6 more frogs hop over. How many frogs are by the pond now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ frogs}$$

2. Leo has 7 toy cars. He gets 4 more for his birthday. How many toy cars does Leo have now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ toy cars}$$

3. Grandpa picks 12 apples. Then he picks 6 more. How many apples does he have now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ apples}$$

4. There are 8 penguins on the ice. 8 more penguins slide over. How many penguins are on the ice now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ penguins}$$

Add To and Take From

Read each problem. Subtract to solve.

Example

Ava has **14** balloons. **5** balloons float away. How many balloons does Ava have now?

$$\underline{14} - \underline{5} = \underline{9} \quad \underline{9} \text{ balloons}$$

1. There are **17** cupcakes on a plate. The class eats **9** of them. How many cupcakes are left?

$$\underline{\quad} - \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ cupcakes}$$

2. **13** butterflies are in the garden. **6** fly away. How many butterflies are still in the garden?

$$\underline{\quad} - \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ butterflies}$$

3. Omar has **16** acorns. He drops **7** of them. How many acorns does Omar have now?

$$\underline{\quad} - \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ acorns}$$

4. There are **20** fish in a tank. **10** fish go to a new tank. How many fish are left in the first tank?

$$\underline{\quad} - \underline{\quad} = \underline{\quad} \quad \underline{\quad} \text{ fish}$$

Add To and Take From

Add or subtract? Write + or – in the circle. Then solve.

1. Rosa has **11** strawberries. She picks **7** more. How many strawberries does she have now?

____ ○ ____ = ____ strawberries

2. There are **15** leaves on a branch. The wind blows **8** away. How many leaves are on the branch now?

____ ○ ____ = ____ leaves

3. The team has **6** soccer balls. The coach brings **9** more. How many soccer balls does the team have now?

____ ○ ____ = ____ soccer balls

4. Nia has **18** cookies. She shares **9** with her class. How many cookies does Nia have left?

____ ○ ____ = ____ cookies

5. **12** turtles sit on a rock. **4** turtles swim away. How many turtles are on the rock now?

____ ○ ____ = ____ turtles

Add To and Take From

Draw dots in the ten frames to solve.

Example

Sam has **7** toy rockets. He gets **6** more. How many toy rockets does Sam have now?

$$\underline{7} + \underline{6} = \underline{13}$$

13 toy rockets

1.

8 owls sit in a tree. 7 more owls fly in. How many owls are in the tree now?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

 owls

2.

There are 15 pumpkins at the farm stand. People buy 6 of them. How many pumpkins are left?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

 pumpkins

3.

Dad has 14 carrots. He uses 8 in the soup. How many carrots are left?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

 carrots

Add To and Take From

Circle the number sentence that matches. Then solve.

Example

Theo has 9 teddy bears. He gets 3 more. How many teddy bears does Theo have now?

$9 + 3 = \square$

$9 - 3 = \square$

$12 - 9 = \square$

12 teddy bears

1.

There are 16 doughnuts in a box. The family eats 7. How many doughnuts are left?

$16 + 7 = \square$

$16 - 7 = \square$

$7 + 9 = \square$

_____ doughnuts

2.

Ivy picks 10 pears. Then she picks 5 more. How many pears does Ivy have now?

$10 - 5 = \square$

$5 + 5 = \square$

$10 + 5 = \square$

_____ pears

3.

There are 11 beach balls by the pool. 4 roll into the water. How many beach balls are still by the pool?

$11 - 4 = \square$

$11 + 4 = \square$

$4 + 4 = \square$

_____ beach balls

4.

Eli has 8 pinecones. He finds 9 more. How many pinecones does Eli have now?

$9 - 8 = \square$

$8 + 9 = \square$

$8 + 8 = \square$

_____ pinecones

Add To and Take From

Read each problem. Add to solve.

Example

Mia has 8 star stickers. Her friend gives her 5 more. How many star stickers does Mia have now?

$$\underline{8} + \underline{5} = \underline{13} \quad \underline{13} \text{ star stickers}$$

1.

9 frogs sit by the pond. 6 more frogs hop over. How many frogs are by the pond now?

$$\underline{9} + \underline{6} = \underline{15} \quad \underline{15} \text{ frogs}$$

2.

Leo has 7 toy cars. He gets 4 more for his birthday. How many toy cars does Leo have now?

$$\underline{7} + \underline{4} = \underline{11} \quad \underline{11} \text{ toy cars}$$

3.

Grandpa picks 12 apples. Then he picks 6 more. How many apples does he have now?

$$\underline{12} + \underline{6} = \underline{18} \quad \underline{18} \text{ apples}$$

4.

There are 8 penguins on the ice. 8 more penguins slide over. How many penguins are on the ice now?

$$\underline{8} + \underline{8} = \underline{16} \quad \underline{16} \text{ penguins}$$

Add To and Take From

Read each problem. Subtract to solve.

Example

Ava has 14 balloons. 5 balloons float away. How many balloons does Ava have now?

$$\underline{14} - \underline{5} = \underline{9} \quad \underline{9} \text{ balloons}$$

1.

There are 17 cupcakes on a plate. The class eats 9 of them. How many cupcakes are left?

$$\underline{17} - \underline{9} = \underline{8} \quad \underline{8} \text{ cupcakes}$$

2.

13 butterflies are in the garden. 6 fly away. How many butterflies are still in the garden?

$$\underline{13} - \underline{6} = \underline{7} \quad \underline{7} \text{ butterflies}$$

3.

Omar has 16 acorns. He drops 7 of them. How many acorns does Omar have now?

$$\underline{16} - \underline{7} = \underline{9} \quad \underline{9} \text{ acorns}$$

4.

There are 20 fish in a tank. 10 fish go to a new tank. How many fish are left in the first tank?

$$\underline{20} - \underline{10} = \underline{10} \quad \underline{10} \text{ fish}$$

Add To and Take From

Add or subtract? Write + or – in the circle. Then solve.

1. Rosa has 11 strawberries. She picks 7 more. How many strawberries does she have now?

$$\underline{11} \quad (+) \quad \underline{7} \quad = \quad \underline{18} \quad \underline{18} \text{ strawberries}$$

2. There are 15 leaves on a branch. The wind blows 8 away. How many leaves are on the branch now?

$$\underline{15} \quad (-) \quad \underline{8} \quad = \quad \underline{7} \quad \underline{7} \text{ leaves}$$

3. The team has 6 soccer balls. The coach brings 9 more. How many soccer balls does the team have now?

$$\underline{6} \quad (+) \quad \underline{9} \quad = \quad \underline{15} \quad \underline{15} \text{ soccer balls}$$

4. Nia has 18 cookies. She shares 9 with her class. How many cookies does Nia have left?

$$\underline{18} \quad (-) \quad \underline{9} \quad = \quad \underline{9} \quad \underline{9} \text{ cookies}$$

5. 12 turtles sit on a rock. 4 turtles swim away. How many turtles are on the rock now?

$$\underline{12} \quad (-) \quad \underline{4} \quad = \quad \underline{8} \quad \underline{8} \text{ turtles}$$

Add To and Take From

Draw dots in the ten frames to solve.

Example

Sam has 7 toy rockets. He gets 6 more. How many toy rockets does Sam have now?

$$\underline{7} + \underline{6} = \underline{13}$$

13 toy rockets

1.

8 owls sit in a tree. 7 more owls fly in. How many owls are in the tree now?

$$\underline{8} + \underline{7} = \underline{15}$$

15 owls

2.

There are 15 pumpkins at the farm stand. People buy 6 of them. How many pumpkins are left?

$$\underline{15} - \underline{6} = \underline{9}$$

9 pumpkins

3.

Dad has 14 carrots. He uses 8 in the soup. How many carrots are left?

$$\underline{14} - \underline{8} = \underline{6}$$

6 carrots

Add To and Take From

Circle the number sentence that matches. Then solve.

Example

Theo has 9 teddy bears. He gets 3 more. How many teddy bears does Theo have now?

$9 + 3 = \square$

$9 - 3 = \square$

$12 - 9 = \square$

12 teddy bears

1.

There are 16 doughnuts in a box. The family eats 7. How many doughnuts are left?

$16 + 7 = \square$

$16 - 7 = \square$

$7 + 9 = \square$

9 doughnuts

2.

Ivy picks 10 pears. Then she picks 5 more. How many pears does Ivy have now?

$10 - 5 = \square$

$5 + 5 = \square$

$10 + 5 = \square$

15 pears

3.

There are 11 beach balls by the pool. 4 roll into the water. How many beach balls are still by the pool?

$11 - 4 = \square$

$11 + 4 = \square$

$4 + 4 = \square$

7 beach balls

4.

Eli has 8 pinecones. He finds 9 more. How many pinecones does Eli have now?

$9 - 8 = \square$

$8 + 9 = \square$

$8 + 8 = \square$

17 pinecones
