

Add & Subtract Decimals

Shade hundred grids to add and subtract decimals.

Remember

0.4 is 4 tenths, or **40** hundredths. So **0.4 = 0.40**.

Then **0.4 + 0.35** is **40 + 35 = 75** hundredths, or **0.75**.

Add. Shade the first number. Shade the second in a new color.

Example

$$0.3 + 0.25 = 0.55$$

1.

$$0.4 + 0.38 = \underline{\hspace{2cm}}$$

2.

$$0.16 + 0.7 = \underline{\hspace{2cm}}$$

Subtract. Shade the first number. Cross out what you take away.

Example

$$0.7 - 0.24 = 0.46$$

3.

$$0.85 - 0.4 = \underline{\hspace{2cm}}$$

4.

$$0.63 - 0.29 = \underline{\hspace{2cm}}$$

Write the equation that each model shows.

Example

$$0.5 + 0.36 = 0.86$$

5.

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

6.

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Add & Subtract Decimals

Line up the decimal points. An empty place is a zero.

Write each problem in the boxes. Line up the points. Then solve.

Example

$3.4 + 1.25$

$$\begin{array}{r} \square 3.4\square \\ + \square 1.25 \\ \hline \square 4.65 \end{array}$$

$1. \quad 6 - 2.37$

$$\begin{array}{r} \square\square.\square\square \\ - \square\square.\square\square \\ \hline \square\square.\square\square \end{array}$$

$2. \quad 12.5 + 3.86$

$$\begin{array}{r} \square\square.\square\square \\ + \square\square.\square\square \\ \hline \square\square.\square\square \end{array}$$

$3. \quad 9.4 - 5.75$

$$\begin{array}{r} \square\square.\square\square \\ - \square\square.\square\square \\ \hline \square\square.\square\square \end{array}$$

$4. \quad 0.8 + 4.67$

$$\begin{array}{r} \square\square.\square\square \\ + \square\square.\square\square \\ \hline \square\square.\square\square \end{array}$$

$5. \quad 15 - 7.08$

$$\begin{array}{r} \square\square.\square\square \\ - \square\square.\square\square \\ \hline \square\square.\square\square \end{array}$$

Add or subtract. Write zeros in the empty places if you need to.

Example

$$\begin{array}{r} 4.60 \\ + 2.85 \\ \hline 7.45 \end{array}$$

6.

$$\begin{array}{r} 9.03 \\ - 4.68 \\ \hline \end{array}$$

7.

$$\begin{array}{r} 14.6 \\ + 7.95 \\ \hline \end{array}$$

8.

$$\begin{array}{r} 10 \\ - 3.45 \\ \hline \end{array}$$

9.

$$\begin{array}{r} 0.87 \\ + 0.46 \\ \hline \end{array}$$

10.

$$\begin{array}{r} 7.2 \\ - 2.84 \\ \hline \end{array}$$

11.

$$\begin{array}{r} 25.08 \\ + 6.9 \\ \hline \end{array}$$

12.

$$\begin{array}{r} 8.5 \\ - 0.76 \\ \hline \end{array}$$

Add and subtract money: totals, receipts, and change.

Find the total cost.

Example

$$\begin{array}{r} \$3.45 \\ + \$2.89 \\ \hline \text{Total: } \$ \underline{6.34} \end{array}$$
