Frogs

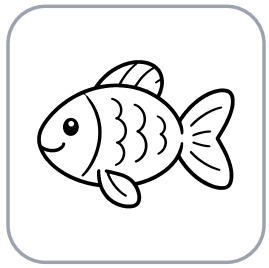

Frogs live in and near water. A frog starts life as a tiny egg in a pond. The egg hatches into a tadpole. A tadpole swims with its long tail, like a fish. As it grows, it gets legs, and its tail gets shorter and shorter. Then it is a frog!

A frog has strong back legs for jumping. It catches bugs with its long, sticky tongue.

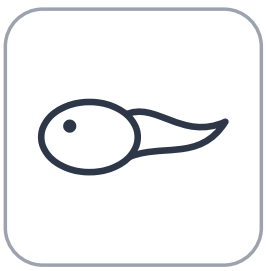

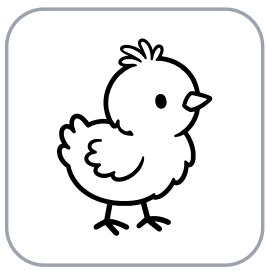

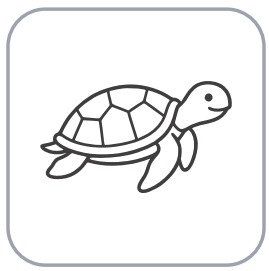

1 What is this text mostly about?

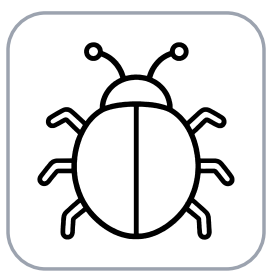

2 What hatches from a frog's egg?

3 What does a frog catch with its tongue?

Read aloud

Bees

Bees are busy insects. A bee has six legs and four wings. Honeybees live together in a home called a hive.

Bees fly from flower to flower. They drink a sweet juice from the flowers called nectar, and honeybees make honey from it. Bees also carry a yellow dust called pollen from one flower to the next. This helps the plants make seeds.

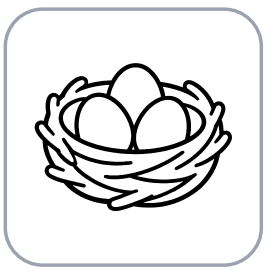

1 What is this text mostly about?

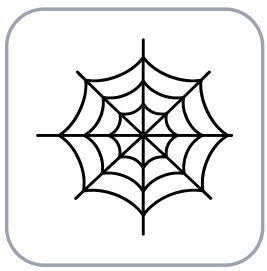

2 Where do honeybees live?

3 What do bees visit?

Read aloud

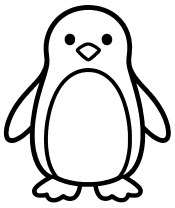

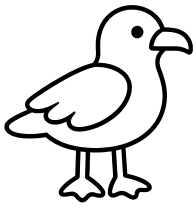

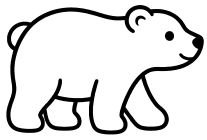

Penguins

Penguins are birds, but they cannot fly. Their wings are stiff flippers. Penguins flap their flippers to swim fast under the water. They dive to catch fish to eat.

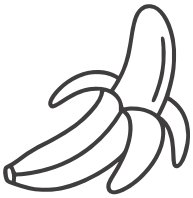

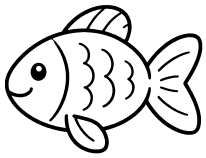

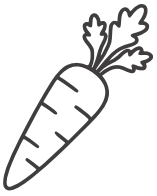

Most penguins live in the south part of the world. Some live on the ice of Antarctica, the cold land at the bottom of the world. A layer of fat and tight, thick feathers keep them warm.

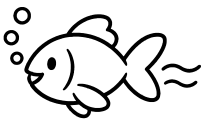

1 What is this text mostly about?

2 What do penguins eat?

3 What can a penguin NOT do?

Read aloud

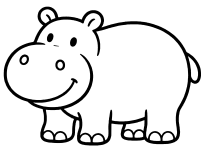

Elephants

Elephants are the biggest animals that live on land. An elephant has a long nose called a trunk. It uses its trunk to smell, to pick up food, and to drink water.

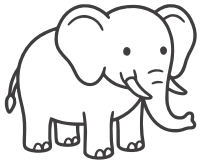

Elephants eat plants: grass, leaves, bark, and fruit. They have big ears, and flapping their ears helps them cool off. Elephants live in family groups. The moms, aunts, and big sisters all help care for the babies.

Read aloud

Owls

Owls are birds, and most owls hunt at night. Their big eyes help them see when it is dark. An owl can turn its head far around to look behind it.

Owls can hear very well, too. Soft feathers help an owl fly with almost no sound. Many owls hunt mice and other small animals.

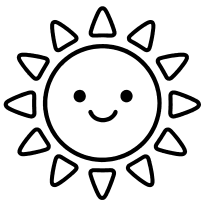

1 What is this text mostly about?

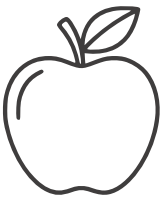

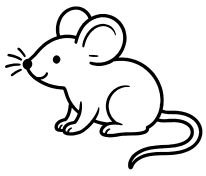

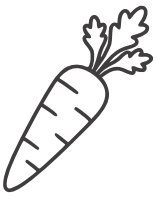

2 When do most owls hunt?

3 What do many owls hunt?

Read aloud

Sea Turtles

Sea turtles live in the ocean. They have flippers to swim. A sea turtle swims up to the top of the water to breathe air.

When a mother sea turtle is ready to lay her eggs, she crawls up onto a sandy beach. She digs a hole in the sand with her back flippers and lays her eggs in it. Later, the baby turtles hatch. They dig out of the sand and crawl to the sea.

For the grown-up

Read this text aloud.
