

Our Question Graphs

An example: the treasures we found on our walk

Example Our question

Which treasure did we find most on our walk?

We tallied

Treasure	Tally	Total
 pebbles	I	6
 acorns		4
 leaves		8
 pinecones		3

What we found out

The most: leaves, 8

The fewest: pinecones, 3

In all: $6 + 4 + 8 + 3 = 21$

We noticed:

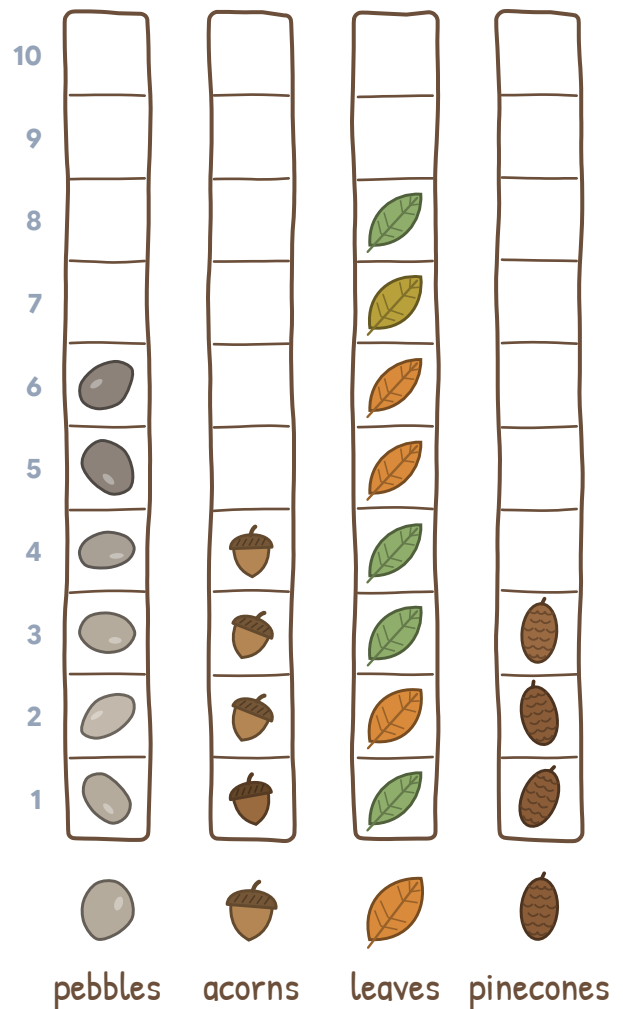

We found 2 more leaves than pebbles.

We wonder:

Will we find more leaves next week?

Our Question Graphs

What did our graph show? Draw, write and count.

The most

How many?

The fewest

How many?

How many in all?

$$\square + \square + \square + \square = \square$$

We noticed...

Now we wonder...
