## Baby Animals

Many animal babies have names of their own. A baby dog is a puppy, and a baby cat is a kitten. A baby chicken is a chick. A baby seal is called a pup.

A baby kangaroo is called a joey. A new joey is tiny! It grows inside a pocket on its mom's belly, called a pouch.

1 **Which one is a chick?**

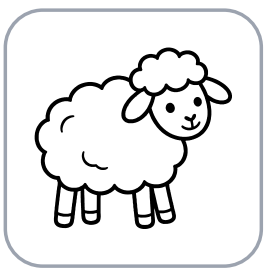

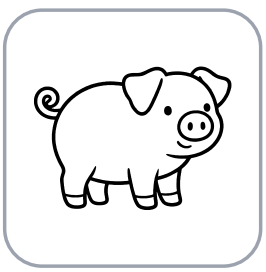

2 **Which one is a pup?**

3 **Which animal has a joey?**

## Animal Homes

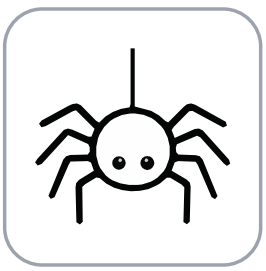

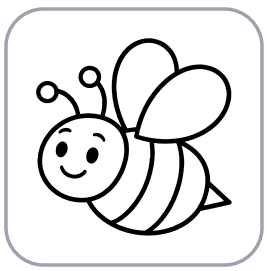

Animals have many kinds of homes. A bird builds a nest of sticks and grass. Honeybees live together in a hive. Many spiders spin webs, and they catch bugs in the sticky webs.

A snail carries its home on its back. Its home is its shell. When a snail is scared, it pulls its body inside its shell.

1 **Which one is a web?**

2 **Which animal lives in a hive?**

3 **Which animal carries its home on its back?**

# Listen and Answer

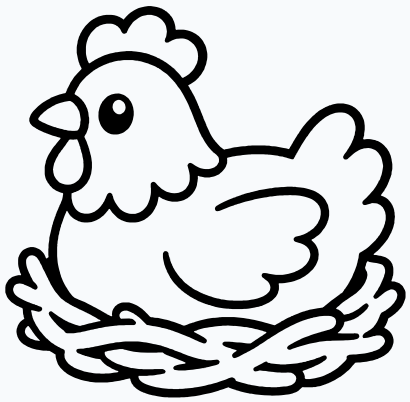

For the grown-up: read this text aloud. The questions are on the next page.

Read aloud

## From Egg to Chick

A hen lays her eggs in a nest. She sits on the eggs to keep them warm. After about three weeks, the chicks are ready to hatch. Each chick pecks a hole in its shell and pushes its way out.

A new chick is wet. Soon its soft, fluffy feathers dry. In a few hours, the chick can walk and peck for food.

For the grown-up
